Each data concerns
a blurb or finisher

Each data[] refs
an image, where
ahref is the img src

Each data[] concerns
a headline or body

Content response.data[0]...

formData.title = .title

formData.cta = ,cta

```
.data.forEach(element => {
  formData[element.tt + key + element.key] =
    element[key];
})
```

each data[] is a
contact field, tt
refs name, email, phone,
etc. and text is that
value
